

April 9, 1974

the Chadron student body this morning. They're not in favor of it. They want to study it. I don't think we should spin our wheels on this thing for another half a day. And I think it should be put into a study and probably without a doubt they'll come out leaving the schools as they are today. And that's the way they should be. We shouldn't incorporate these four schools into the University of Nebraska. We have a two-headed monster now, we don't want a five-headed monster or six-headed monster.

PRESIDENT: Senator Stahmer.

SENATOR STAHMER: No response.

PRESIDENT: Senator Barnett.

SENATOR BARNETT: Question of the Chair, the Clerk or somebody. How long do we have on Select File before this thing can be taken care of, these actions can be taken care of this year? Do we have to have this done by noon, Vince, is that what Emery said? Did Emery say yesterday that anything we got done by noon today, we would still have time to....?

CLERK: Well, I talked with him this morning and what his report is, is that anything you're going to juggle, you'd better juggle this morning and the closer to noon you get, the more you increase the odds that it isn't going to get turned around yet today. Because it has to be correctly enrolled today or you cannot vote on it this session unless you extend the session.

SENATOR BARNETT: Okay then, I would...I would have to object to Senator Stahmer or Senator Carpenter's move until we get done with Select File and then we take it up at the proper time. I think we'd better work on Select File and finish those bills up there and if we have to, then we can let the schools work on this and bring it in next fall and do it on their own if they'd like to do so. And I'm sure they'd like to do it that way.

PRESIDENT: Well, stand by, Senator Barnett. You can object to Senator Stahmer's but he has a proper motion over here.

SENATOR BARNETT: That's right. I'll take his motion first then.

PRESIDENT: All right, fine then. Senator Stahmer, there's no unanimous consent for your amendment. And also I think the Chair in order to keep things from getting clouded here, and having one issue related to the other and I think it could be a clear division of the question on this. Let's have a separate motion then. After we dispatch Senator Carpenter's.

SENATOR STAHMER: Well, let's vote on Senator Carpenter's first and see if the Body even wants to take care of it. And then I'll tap my motion on afterwards if they do.

PRESIDENT: Thank you. We'll do that. Senator...all right. Senator Stahmer, do me a favor and turn your light off please. Thank you, sir. All right, the motion before the House then at this time is to suspend the rules and place LR133 at the bottom of Select File. Now, Senator Carpenter, do you have any closing remarks? Senator Carpenter, any closing remarks on your motion?
